

SSEE Inflation: α -attractor with $\alpha = \varphi^4/3$ (exact)

$$n_s = 1 - \varphi^{-7}, \quad r = \varphi^{-10}, \quad N = 2\varphi^7 \approx 58 \text{ e-folds}$$

(a) n_s - r plane: SSEE $\equiv \alpha$ -attractor, $\alpha = \varphi^4/3$

(b) α -attractor family: SSEE at $\alpha = \varphi^4/3$
